Handcrafted *the same way for 125 years*

Iconic, timeless, aspirational and tactile, each sink is an original design, handcrafted to give a lifetime of service and pleasure.

At Shaws we don't believe in mass production; we believe in quality, individuality and authenticity in all we do. It takes time to hand-make Shaws sinks, between three to four weeks in total, using time-honoured techniques that have been passed down from master craftsman to apprentice for well over a century.

Known as 'slip casting', the process begins with a mixture of locally sourced clay and water being poured into porous moulds – by hand, naturally.

When the newly formed sinks are dry enough, craftsmen remove them from their moulds before getting to work doing what they do best – expertly hand-finishing these artisan products through a process of sponging and 'fettling' to create a smooth surface.

It's at this stage that the master craftsman proudly imprints his name on the base of his creation, before leaving the sink to gradually dry out for a period of over 40 hours. Only then are the sinks deemed ready to be prepared with a first coat of glaze, before being glazed for a second time to improve the feel and durability of the product. Firing in specially designed kilns at temperatures of over 1,200 degrees Celsius completes this rigorous process.

Handgemacht *in der selben Art und Weise seit 125 Jahren*

Ikonisch, zeitlos, anspruchsvoll und haptisch, jede Spüle ist ein Original Design, handgefertigt, um Ihnen ein Leben lang Freude zu bereiten.

Bei Shaws glauben wir nicht an Massenproduktion; wir glauben an Qualität, Individualität und Authentizität in allem, was wir tun. Es braucht Zeit, um Shaws Waschbecken von Hand herzustellen. Zwischen drei und vier Wochen, mit altbewährten Techniken, die vom Handwerksmeister zum Lehrling seit weit über einem Jahrhundert weitergegeben wurden.

Das als 'Schlickerguss' bekannte Verfahren beginnt damit, dass eine Mischung aus lokalem Ton und Wasser in poröse Formen gegossen wird - natürlich von Hand.

Wenn die neu geformten Waschbecken trocken genug sind, entfernen die Arbeiter sie aus ihrem Formen, bevor sie sich an ihr Werk machen um das tun, was sie am besten können – fachmännische Handarbeit. Diese handwerklichen Produkte werden durch Schwämmen und 'Putzen zu' einer glatte Oberfläche.

An diese Stelle stempelt der Handwerksmeister stolz seinen Namen auf die Basis seiner Kreation, bevor er das Becken für einen Zeitraum von über 40 Stunden nach und nach austrocknen lässt. Erst dann gelten die Spülen als bereit, um mit einem ersten Anstrich vorbereitet zu werden.

Eine Glasur, bevor sie ein zweites Mal glasiert wird, um die Haptik und Haltbarkeit des Produktes zu verbessern. Der Brennvorgang in einem speziell konstruierten Ofen bei Temperaturen von über 1200 Grad Celsius vervollständigt dieses strenge Herstellungsverfahren.

Fatto a mano *allo stesso modo per 125 anni*

Iconico, senza tempo, ambizioso e tattile, ogni lavabo è un originale design, realizzato a mano per offrire una vita di servizio e piacere.

Alla Shaws non crediamo nella produzione di massa; crediamo nella qualità, nell'individualità e autenticità in tutto ciò che facciamo. Ci vuole tempo per realizzare a mano i lavelli Shaws, tra tre a quattro settimane in totale, utilizzando tecniche antiche che sono state tramandate da maestro artigiano ad apprendista per oltre un secolo.

Conosciuto come 'slip casting', il processo inizia con una miscela di provenienza locale argilla e acqua versate in stampi porosi – a mano, naturalmente.

Quando i lavelli appena formati sono abbastanza asciutti, gli artigiani li rimuovono dai loro stampi prima di mettersi al lavoro facendo ciò che sanno fare meglio: rifinire sapientemente a mano questi prodotti artigianali attraverso un processo di spugnatura e sbavatura per creare a superficie liscia.

È in questa fase che il maestro artigiano imprime con orgoglio il proprio nome sulla base della sua creazione, prima di lasciare asciugare gradualmente il lavandino per un periodo di oltre 40 ore. Solo allora i lavelli sono ritenuti pronti per essere preparati con una prima mano di smalto, prima di essere smaltato una seconda volta per migliorare la sensazione e la durata del prodotto. Cottura in forni appositamente progettati a temperature superiori a 1200 gradi Celsius completa questo rigoroso processo.

PLEASE NOTE, our sink dimensions can vary by a plus or minus of 2%, as they are hand-made and shrink during firing. We therefore recommend that your kitchen fitter is aware of this and that no work surfaces or cabinets are cut before measuring your sink. Due to the handcrafted nature and weight of our sinks, we also recommend a specialist fitter installs your sink and that it is properly supported.

BITTE BEACHTEN SIE BITTE, dass die Abmessungen unserer Spülbecken um ca. 2% variieren können, da sie handgefertigt sind und beim Brennen schrumpfen. Wir empfehlen daher, dass Ihr Küchenmonteur sich dessen bewusst ist und dass vor dem Ausmessen Ihrer Spüle keine Arbeitsflächen oder Schränke zugeschnitten werden. Aufgrund der handgefertigten Beschaffenheit und des Gewichts unserer Spülbecken empfehlen, dass wir den Einbau durch das Fachhandwerk.

SI PREGA DI NOTARE che le dimensioni del nostro lavello possono variare di un più o meno del 2%, in quanto sono fatti a mano e si restringono durante la cottura. Si consiglia quindi di informare l'installatore della vostra cucina e di non tagliare le superfici di lavoro o gli armadi prima di misurare il lavello. A causa della natura artigianale e del peso dei nostri lavelli, raccomandiamo inoltre che il vostro lavello sia installato da un installatore specializzato e che sia adeguatamente supportato.

Please see website for warranty details of our sinks and accessories.

Die Garantiebedingungen für unsere Spülen und Zubehörartikel finden Sie auf unserer Webseite.
